A Call to Action by Stakeholders: United States Food Loss & Waste 2030 Reduction Goal

The federal government, led by EPA and the United States Department of Agriculture (USDA), is seeking to work with communities, organizations and businesses along with our partners in state, tribal and local government to reduce food loss and waste by 50 percent over the next 15 years. As an important stride in reaching the 2030 food reduction goal, EPA hosted the Food Recovery Summit where organizations across the food chain, from manufacturers to consumers, met to discuss the key challenges in reducing food loss and waste. Based on this summit and continued input, EPA, USDA and stakeholders from across the food chain have developed a collaborative Call to Action, which identifies current opportunities and challenges in reducing food loss and waste in the United States.
