

Introducing The Busch Systems

RESOURCE CENTER

History of the Resource Center

- Inception of idea was 10 years ago
- To provide a high quality, factual portal for recycling information
- FF 2015, Team gets a hold of the idea, clients are looking for powerful tool to track the success of their programs
- Officially launched to the public on April 26th, 2017

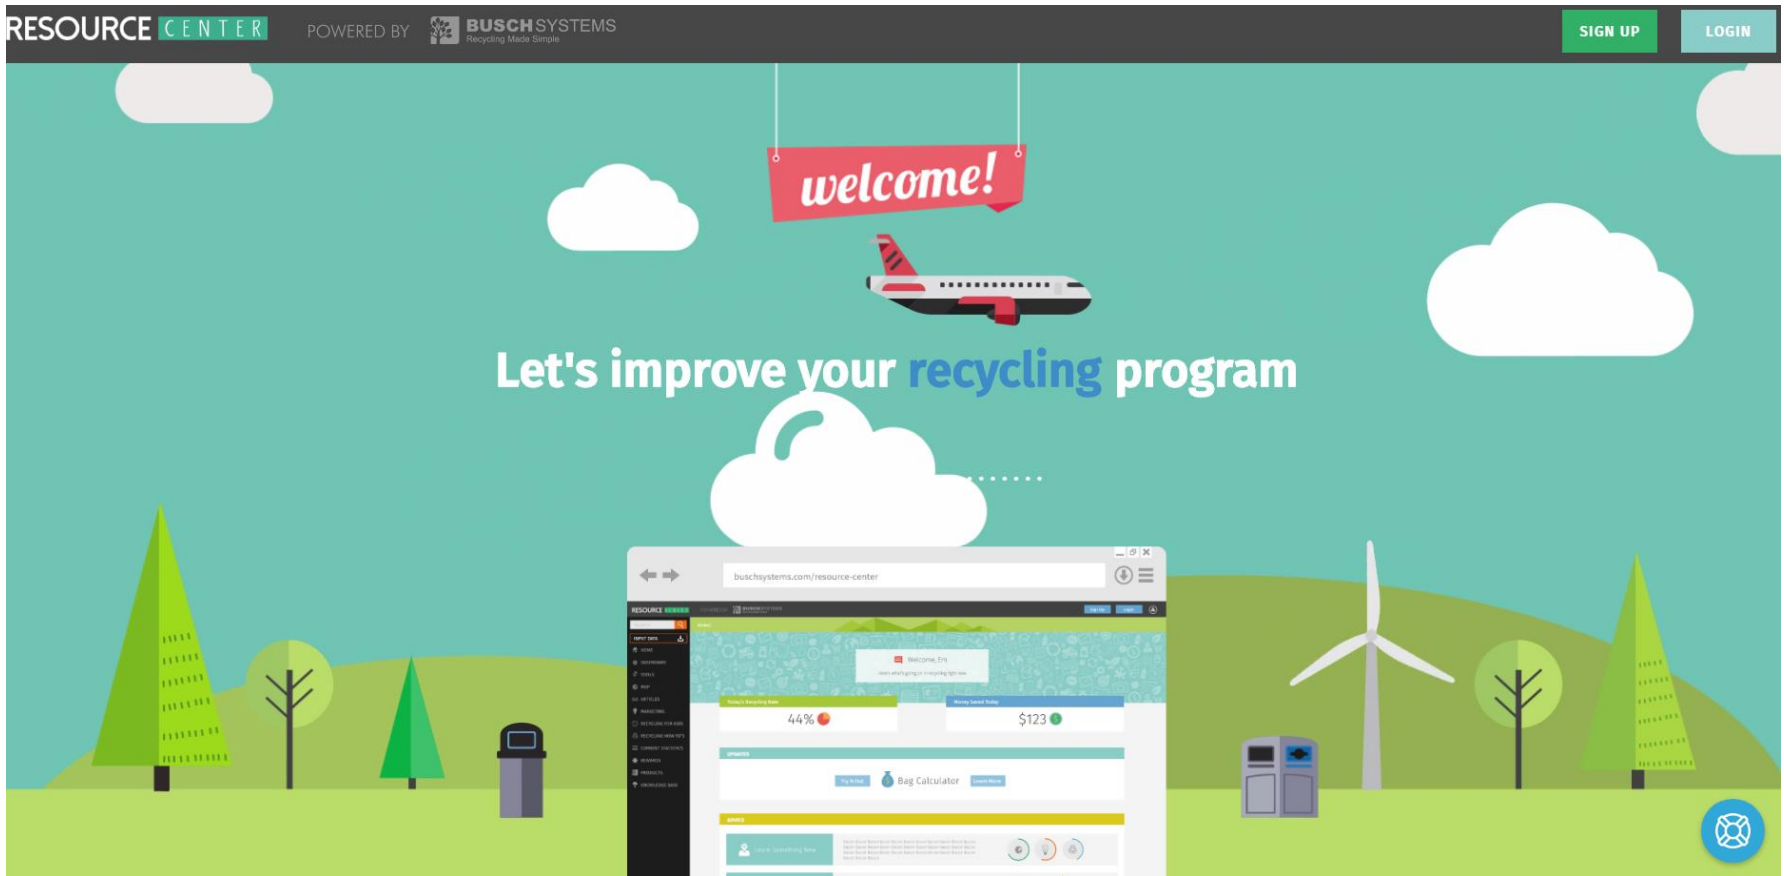

Intro – Getting Started Video

What is the Resource Center?

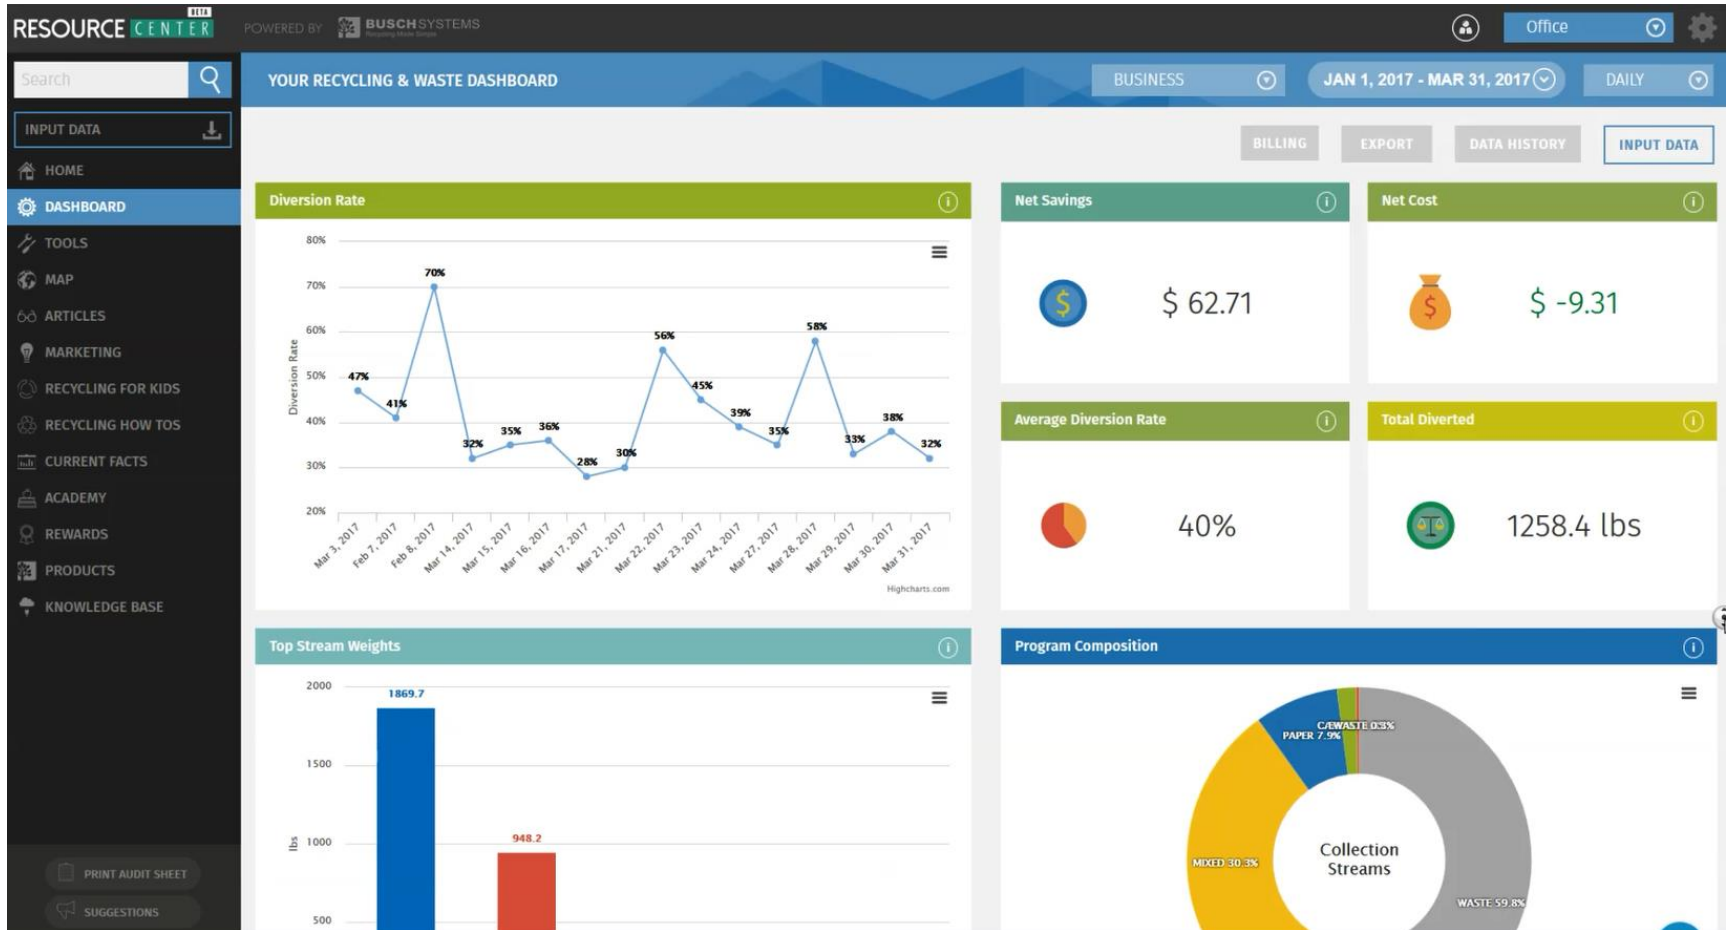

- FREE application designed to improve collection programs
- Ground-breaking software suitable for all verticals
- First application to help track collection at the station level
- Provides statistics on diversion rates, breakdown of collection streams, amount of money saved and tracks the positive impact of recycling on the environment
- Currently no other application available on the market

SUGGESTIONS

CREATE YOUR FIRST *PROGRAM DIVISION!*

Divisions are used to split your recycling program into as many groups as you need. Some may use this function to track different floors, buildings, or even whole cities separately. Just remember that smaller divisions are more flexible, but more work to maintain.

Next Up - Station Creation

The screenshot displays the Resource Center web application interface. At the top, the header includes the 'RESOURCE CENTER' logo, 'POWERED BY BUSCH SYSTEMS', and user controls for 'Busch Systems' and 'New Division'. A search bar is located on the left. A vertical navigation menu on the left lists various sections: HOME, DASHBOARD, TOOLS, MAP, ARTICLES, MARKETING, RECYCLING FOR KIDS, RECYCLING HOW TOS, CURRENT FACTS, ACADEMY, REWARDS, PRODUCTS, and KNOWLEDGE BASE. The main content area features a 'GETTING STARTED' banner with the Resource Center logo and the text 'CREATE YOUR FIRST STATION!'. Below this, a green box contains the instruction: 'Stations are your recycling & waste bins located in centralized areas within your division. For this walkthrough choose a particular station closest to you to get started.' The interface then prompts the user to 'Drag and drop bins into your first station!'. This section includes input fields for 'Station Name' (containing 'New Station') and 'Station Code' (containing 'ABC123'). A large dashed box represents the station area, currently containing a 'WASTE' bin icon. To the right, a 'Drag & Drop' panel shows a grid of bin icons: WASTE, BOTTLE, CANBOT, MIXED, FOOD, GLASS, ORGANIC, and CANS.
