

Community Waste Management: A Collaborative Approach at Carleton College

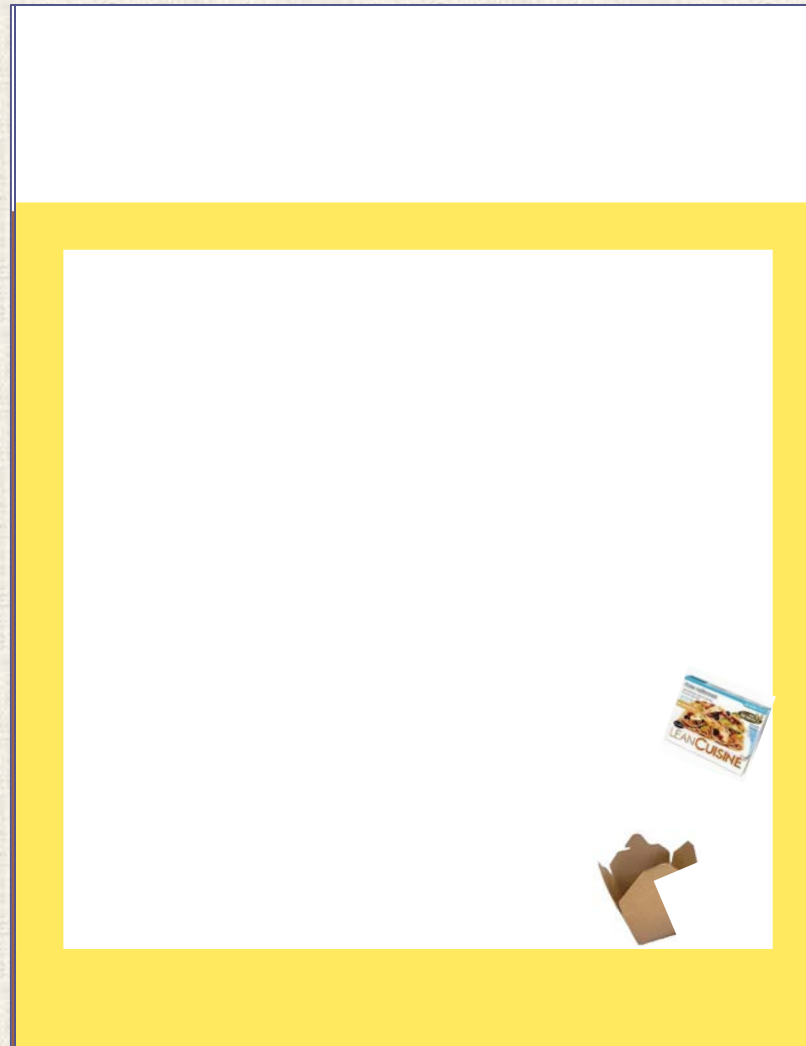

Courtney Dufford,
Sustainability Assistant

Carleton Community Waste Program

- Centralized waste stations in all academic and administrative buildings
- Composting, recycling, and trash always available together
- Bathroom composting

Standardized Picture Signage

Individual Engagement

In order to reduce plastic liners and increase awareness, faculty and staff can volunteer to...

- Keep their office bins but manage the frequency of waste disposal into the central stations
- Give up their personal bins entirely

Collaborative Implementation

- Formed Custodial Waste Busters
- Conducted meetings with each department
- Established personal connections across campus

Thank You!
